Certificate
FEB 16 2005
of Correction

Sir:

Patentees hereby respectfully request the issuance of a Certificate of Correction in connection with the above-identified patent. The corrections are listed on the attached Form PTO-1050, submitted in duplicate. The corrections requested are as follows:

On the title page, please insert the following section after Item [63] **Related U.S.**

Application Data:

-- [30] **Foreign Application Priority Data**

Mar. 18, 1999 (EP) 99105596 --.

Priority of European application no. 99105596 filed March 18, 1999 was made on applicants' Declaration filed with the application papers on September 18, 2001. The certified priority document was filed on March 16, 2004 to perfect applicants' priority claim, and the Examiner acknowledged receipt of said certified copy on December 13, 2004. Therefore, it is respectfully requested that the foreign application priority data be included by way of Certificate of Correction.

FEB 17 2005

The requested correction is for an error that appears to have been made by the Office. Therefore, no fee is believed to be due for this request. Should any fees be required, however, please charge such fees to Winston & Strawn LLP Deposit Account No. 50-1814. Please issue a Certificate of Correction in due course.

Respectfully submitted,

2/10/05

(57) **ABSTRACT**

The invention relates to a sealed cartridge, provided to be extracted under pressure, containing a substance (15) for preparing a beverage, comprising a dish (9) with a bottom (10) and a side wall (11), having substantially the shape of a frustum of a cone, and a circular edge with a diameter greater than the bottom, and a cover (12) welded to the periphery of the edge of the dish, in which the cover (12) consists of a flexible material which is impermeable to oxygen, chosen from the group consisting of aluminum, an aluminum/plastic composite, an aluminum/plastic/paper composite, pure or multi-layer plastic, the said cartridge not comprising a filter or a weakening zone and the cover being intended to be torn only through the effect of the force of the extraction fluid when extraction starts, the said cartridge comprising, in the dish at the level of the bottom, a barrier (13) that is automatically resealable against leakage of the substance upon withdrawal of the fluid injection needle.
